Joseph Spillers

Systems, Automation & Software Engineering

I turn support pain into working tools.

Indianapolis, IN • (260) 442-2113 • jdspille@gmail.com • github.com/spilloid • linkedin.com/in/joseph-spillers

SUMMARY

Service Desk Technician at Moser Consulting combining **enterprise systems administration, software development, endpoint security and AI workflow automation**. Five+ years turning manual workflows into reusable tools, dashboards and integrations. Build and deploy software in Rust, Python, PowerShell and Go to improve service delivery and make operations repeatable.

EXPERIENCE

Service Desk Technician · **Moser Consulting** — Aug 2026 – Present · Indianapolis

- Provide Tier 2/3-level support across Windows, macOS, Microsoft 365, Entra ID, Intune, Active Directory and networking in a multi-client MSP environment.
- Provision devices, manage identity and access, and resolve deployment, licensing, BitLocker, endpoint protection and compliance issues.
- Develop and deploy Rust, Python and PowerShell applications and automation to eliminate repetitive work, using AI-assisted development.
- Build MCP integrations for Jira time tracking and Microsoft 365 administration, and tools for network discovery, remote access, printer deployment and device provisioning.
- Turn recurring issues into reusable solutions and documentation; collaborate with engineering teams and leadership on technical improvements.

Help Desk Support Specialist · **One View, Inc.** — Dec 2025 – 2026 · Indianapolis (Hybrid)

Built tooling for dealership document-management workflows, scan stations, data feeds and production processing.

- Automated workstation setup, scanner workflows and endpoint decommissioning; documented repeatable procedures and escalation paths.
- Built operational dashboards and data checks to surface production metrics, missing feeds, no-scan accounts and recurring issues.

Technical Support Specialist II · **Resultant** — Oct 2023 – May 2025 · Remote

Tier 2 technical support for public-sector and enterprise clients.

- Resolved complex software and infrastructure issues; managed escalations and systemic defects with engineering.
- Improved the knowledge base to reduce repeat tickets and accelerate resolution.

DevOps Support Technician III · **RPM Technologies** — Mar 2021 – Oct 2023 · Indianapolis

Architected DevOps automation for 2,000+ endpoints across cloud, on-prem and hybrid environments.

- Built PowerShell/Bash deployment automation, increasing service-desk efficiency ~30%; dashboards and alerting reduced client downtime ~25%.
- Caught errors before production; promoted from Tier 2 to Tier 3 DevOps within 18 months and authored SOPs and training documentation.

SKILLS

SUPPORT ENGINEERING & OPS

Technical support, escalation handling, workflow triage, endpoint provisioning, runbooks, documentation

DATA & OBSERVABILITY

DuckDB, dbt, Postgres, Grafana, dashboards, reporting pipelines, KPI tracking

AI-ASSISTED ENGINEERING

MCP integrations, Jira workflows, Microsoft 365 automation, Claude Code, AI prototyping, test planning, code review

AUTOMATION & INTERNAL TOOLS

Python, PowerShell, Go, Rust, C#, ASP.NET Core, .NET / WinForms, TypeScript, Bash, browser automation, CLI & desktop utilities

INFRASTRUCTURE & SYSTEMS

Windows, macOS, Linux, Microsoft 365, Entra ID, Active Directory, Intune, BitLocker, endpoint security, Docker, Azure, Microsoft Graph, RMM, networking

EDUCATION & CERTIFICATIONS

B.S. Computer Science, IUPUI · Honors · GPA 3.8 · Math minor
CompTIA Network+ · Azure AZ-900 · CKA (in progress)
